HEADS UP!

A LARGER-THAN-LIFE WAR HERO IS COMING TO LONG BEACH.

ARRIVAL: MONDAY, FEBRUARY 23, 2:30 P.M.

DEPARTURE: WEDNESDAY, FEBRUARY 25, NOON.

Next Monday, February 23, at approximately 2:30 p.m., look into the sky. You'll see and hear one of the fastest and noisiest, not to mention biggest, military aircraft ever built—the Boeing B-1B bomber—as it approaches Long Beach Airport for touchdown.

The B-1B bomber played a key role in Operations Enduring Freedom and Iraqi Freedom. The long-range heavy bomber is 146 feet long with a wingspan of 137 feet. At maximum take-off weight, the B-1B bomber weighs approximately 477,000 pounds and it can fly 900 plus miles per hour.

If you miss this rare opportunity to salute a larger-than-life war hero, you can wave goodbye on Wednesday, February 25. Departure is scheduled at noon.
